CREDITS GRANTED BY NATO COUNTRIES TO THE SOVIET BLOC  
AND COMMUNIST CHINA

TENTH REPORT TO THE COUNCIL COVERING THE PERIOD UP  
TO 30th JUNE, 1964

I. MAIN FINDINGS

NATO countries' outstanding credits to the Soviet Bloc and Communist China diminished in the first six months of 1964 for the first time since the reporting procedure was established(1). The overall level of these credits on 30th June, 1964, amounted to \$980 million, a decrease of \$87 million or 8% since 31st December, 1963(2). Information available to the Committee as a result of the new procedure for notification of credits exceeding 5 years(3) suggest that outstanding credits may well increase again during the second half of 1964.

2. Outstanding credits to Communist China dropped by 35% to \$32 million while credits to the Soviet Bloc(4) fell by 7% to \$949 million. Most of this latter decrease was due to a fall of 20% in outstanding credits to the USSR, but the limited amounts of credits to the Soviet-Occupied zone of Germany also dropped by 18% and those to Poland by 3%. Credits to other European Communist countries, covered by the procedure, which since 1962 have shown a more rapid rise than the other reported credits, continued their increase but it was slowed down to a mere 6% - against 39% in the preceding six months' period.

- 
- (1) Outstanding credits over 180 days to Communist countries have, on the basis of information received from delegations, been reported at six monthly intervals from 31st July, 1959, (31st December, 1961 for China) to 30th June, 1964, as shown in Table I (for selected years) and in Table II.
  - (2) Table III indicates the changes in the amounts of credits between the dates chosen.
  - (3) See AC/127-D/154(Final).
  - (4) As agreed, the Soviet Bloc is understood to include the USSR, Albania, Bulgaria, Czechoslovakia, Hungary, Poland, Rumania, the Soviet-Occupied zone of Germany and the Soviet-Occupied sector of Berlin.

NATO CONFIDENTIAL

3. As against this drop in credits outstanding at the end of the first half of the current year, exports from NATO countries, as a whole, to Communist countries during the same period have continued to grow, as it appears from the chart at Annex(1). The curves for export and outstanding credits diverge clearly for the first time since 1960. As shown in Table IV, there has been a marked difference between the evolution of the exports (in particular those going to the USSR) from the European member countries on the one hand and from the North American on the other; while the former dropped sharply in the second half of 1963 and showed some further decrease in the first half of 1964, the latter rose substantially during the same periods, mainly as a result of deliveries of wheat. A comparison of export figures for the periods mid-1962 to mid-1963 and mid-1963 to mid-1964 shows that the share of the North American member countries in total NATO exports to the USSR rose from 3% to 48%. As pointed out in earlier reports, it is not possible on the basis of available information to determine at what period the delivery of goods, to which the credits apply, is carried out, nor in consequence to establish a precise comparison between the volume of credits and of exports.

II. THE VARIOUS CATEGORIES OF CREDITS AND THEIR DISTRIBUTION AMONG RECIPIENT COUNTRIES

4. The most important among these credits are private credits guaranteed by governments(2), accounting for 84% of the total. They fell by 11% in the first six months of 1964 against a rise of 9% in the preceding period. Since the last reporting date, the level of these credits in each of the recipient areas and the share of these areas in total private credits guaranteed by governments and granted to the Soviet Bloc (excluding Communist China), has evolved as follows:

(i) The USSR

- decrease of \$69 million on 21%;
- share reduced from 38% to 33% (maximum 42% mid-1962).

- 
- (1) The comparison between the trend in the level of credits and the value of exports attempted in the chart is based on private credits guaranteed by governments only since government-to-government credits now outstanding appear to bear no relation to recent exports and since information on non-guaranteed private credits is fragmentary and is not available over the whole period covered by the chart.
  - (2) The reported figures comprise the total value of such credits including that part of the credit which remains at the exporter's risk (see AC/127-R/104, Item I(4)).

(ii) Poland

- decrease of \$8 million or 4% (less than average for the Soviet Bloc);
- share slightly increased from 25% to 26% (maximum 74% mid-1959).

(iii) Soviet-Occupied zone of Germany

- decrease of \$8 million or 18%;
- share slightly reduced from 5% to 4.5% (maximum 8% end-1952).

(iv) Other countries of the Soviet Bloc

- increase of \$4 million or 1.6%;
- share increased from 32% to 36% (19% in January 1951).

5. Credits to Communist China, consisting solely of guaranteed private credits, dropped by \$17 million or 35% in the course of the first six months of 1964. Their share in total credits of this category granted to the Soviet Bloc and Communist China combined was 4%, against a maximum of 16% in June 1962.

6. Information received on private non-guaranteed credits is still most probably incomplete; however, in view of the order of magnitude involved, such information has been included in the present report for the three reporting dates 30th June, 1963, 31st December, 1963 and 30th June, 1964. It is uncertain whether these figures cover the totality of these credits, but they are comparable and give a fair basis for assessing a trend between these dates. These credits constitute 9% of the total of reported credits to the Soviet Bloc. They rose by 18% during the first six months of 1964 but the amount outstanding to the USSR fell and there were no such credits granted to the Soviet-Occupied zone of Germany. By mid-1964 the USSR accounted for 22% of these credits (against 28% end-1963), Poland for 10% and the other countries of the Soviet Bloc for 68% (against 62% end-1963). Although private non-guaranteed credits only represented 17% of total credits to these latter countries, they increased by \$13 million in the period under review against an increase of only \$4 million in private credits guaranteed by governments.

7. Government-to-government credits(1), from which only Poland had benefited, again diminished slightly; they are in the process of being progressively reimbursed and no new credits appear to have been granted since NATO started to follow the trend of credits to the Soviet Bloc.

(Signed) F.D. GREGH  
Chairman

OTAN/NATO,  
Paris, XVIe.

- 
- (1) These do not include credits granted under bilateral trade agreements which normally extend over a period of less than 180 days nor do they include sales of agricultural commodities under Public Law 480 of the United States. It has been agreed that, if any member country were to contemplate adopting an attitude not in conformity with the policy pursued by NATO of not granting any government-to-government credits to the USSR, such a country would immediately inform the Committee so that the matter might be discussed there (C-M(59)75, paragraph 3).
