- 1) No data can be taken from the official statistics for 1946 and 1949 concerning farms of the "Socialist sector"
- 2) Up to 1958 only farms with a usable area of 0.5 ha, as from 1959 farms with a usable area of more than 1 ha (excluding personal holdings of the LPG farmers).
- 3) Up to 1959 LPG including GPG and production co-operatives of gainfully employed fishermen.
- 4) Farms with and without commercial horticulture.
- 5) The church-owned farms are included in the SVB from 1950 to 1955. No official data are available for the other years. In the 1939 statistics they were included in the breakdown according to size.
- 6) The remaining 13,800 farms of the private sector include a small number of farms, especially commercial horticultural enterprises, church-owned farms, fruit-groves, tree-nurseries etc.

- 1) The figures listed in this table as "gross investment in fixed assets" are, unless stated otherwise, the official investment figures taken from the Statistical Yearbook of the "DDR" and official plans
- 2) According to the fulfilment report of the Central Statistical Administration investments contained in the economic plan for 1964 only reached 17,400 million DM-East (compared with 16,400 million in the year before). The rest are investments outside the plan. In all years including 1965, the investment plan has not been fulfilled, according to the report mentioned above.
- 3) Of the target figures for the 1st Seven-Year Plan only the figures for the basic year (1958) and the final year (1965) as well as the total amount could be found in official documents. The target figures for 1961 could be gathered from references in official speeches, while the figures for the remaining years have been estimated accordingly.
- 4) The target figures for the 2nd Seven-Year Plan result from the official figure for the basic year (target figure 1963 = 16,800 million DM-East), the official figure for the final year and the official total amount.
